

SCDXC Newsletter

The Southern California DX Club is a group of dedicated men and women active in the amateur radio community who enjoy communicating over the air with other radio amateurs around the world.

The SCDXC strongly supports the DX Code of Conduct. Please visit their website:

www.dx-code.org

The SCDXC newsletter is published monthly and released to club members around the first of each month. Amateur and DX related letters, news and pictures are welcome and will be published as time and space permit.

Articles will be republished with recognition of the author and the club. Re-use of copyrighted materials require the original author's permission.

Any questions regarding this newsletter or its articles should be addressed to the Editor, Bill, N6RV at:

n6rv@scdxc.org

Club meetings are held on the second Thursday of the month at 7:00 PM except May, June, and May.

Please check the club web site for events and details at:

<http://www.scdxc.org>

If you are in the area please say hello on our repeater:

2022 International DX Convention at Visalia! Wyndham Hotel April 8, 9, 10

The 2022 convention will be live! To date we have 15 committee seats filled and 9 volunteer helpers! Many of the 2022 volunteers have worked on past conventions. We have not approached all the former committee members. Please do not feel offended if your name is not in the slot you filled in prior conventions. Just contact the chairman and we will put your name in! If there is a position you want and it is filled we can arrange wrestling match on Zoom! We do have some openings for some very important tasks! Note that we are also looking for part time helpers as well. If you feel so inclined please join us! We will make the IDXC great again!

The May General Meeting

May 13, 2021 7 PM PST

Our May meeting will again be by ZOOM. See the links below. We have a great presentation, Carl Luetzelschwab, K9LA, will join us. The title of the presentation is "Cycle 25 Is Alive!" It will be a quick review of all 24 previous solar cycles and what propagation to expect right now followed by a talk about the many Cycle 25 predictions, the status of Cycle 25 and when we can expect the higher bands (15m, 12m, and 10m) to come back on a consistent basis. Don't miss it!!!

The meeting begins at 7 PM. There is a half hour before the meeting to meet and greet (6:30 PM) and a half hour before that to check out your gear (6 PM).

Join Zoom Meeting May 13, 2021

From the Desk of the President

Larry Mallek, K6YUI

Well, here we are getting ready for May! April sure went by fast for me. Got some things done but still much more to do. The meeting in April was great and John has another great presenter for us at the May meeting.

The bands have really been hopping on all modes. The good news is that after the last months newsletter went out showing the positions needed for the 2022 IDXC we had many people sign up. The one that I like is from Will—K6ND, SCDXC president 1998. Though he has lived in Pennsylvania for the past several years Will has remained a member. He emailed us and volunteered to fill in wherever needed. WOW!

We still have some positions to fill and we hope that some more members will step forward, even if it is a helper position. Many hands makes the work light.

For those that have not heard, we have a new trustee for K6DXC. Many thanks to Doris Hughes, K6KSY, long time member and wife of Mel K6SY. There help on club matters over the years has kept us going!

Remember the SCDXC general meeting on the second Thursday of the month. Equipment check out at 6:00 PM, members get together starting at 6:30 PM and the meeting begins at 7:00 PM.

Keep April 8 - 10, 2022 open for the IDXC in Visalia at the Wyndham Hotel! See you there! Don't forget the 2021 Virtual International DX Convention.

73,
Larry Mallek, K6YUI
President, Southern California DX Club

May Calendar

May 1	ARI International DX Contest
May 8	CQ-M International DX Contest
May 13	Zoom Club Meeting 7 PM

VP May 2021 Blurb

John Schroeder, N6QQ

Hello SCDXC Members

The month of May is here already. This year sure is moving along.

Have you signed up for the 72nd International DX Convention? There will be 2 days of Virtual Convention May 15-16. Pre- Registration is on. So far, 722 USA hams and 90 Non-US. Over \$5,000 in Prizes - No Raffle tickets needed.

<https://www.dxconvention.com/index.html>

6 meters is showing some life. 3D2AG - worked lot of local hams both on FT8 and CW!

We are still looking for a meeting site. If you know of a location along the 405, let us know.

We are looking for sites on the East side of Los Angeles, like Downey, or Paramount. We have one that will let us have the facility on Saturdays. We prefer the second Thursday and we will be seriously looking for a venue

Keep the bands alive.

73 and Good DXing!

John Schroeder

Rumors on the Band

This month's DX pickings is slim! There is always the CQWW WPX CW contest at the end of the month! You can always grab a couple of new ones in that event! Keep a close eye on 6 meters. We have had a few Pacific openings the past few months. These are highly unusual!!!!

Well things have really taken off! The numbers jumped by 4 for the club and ClubLog leaders picked up 4. We are still a long way from 2020 standings!

Peter, N0FW still leads the pack. Locally, the king of the hill on the hill, Larry, K6RO, tops the deck with Bill, N6WS following deceptively close. Sandbagging are we?

The competition has been close except the curve spoiler at the top. If certain individuals would wake earlier, not at noon, we would be jockeying for first. I like my sleep and so does N6QQ!

Fellowship of the Schroed

All are Welcome!

2021 Get Schroeder Contest

We are entering Es season! Usually we have openings in the beginning of May. On April 21 we had an opening to Fiji (3D2) that was a new six meter entity for many club members. Antoine was +14 on FT8. He then scooted down to 50.295 MHz and worked everyone again on CW. He was 12 dB out of the noise (400 Hz BW) hitting about S7. There was also a Hawaii opening a few days ago. These are very unusual.

Note that John, N6QQ, with his new 7 element 6 meter beam is really racking up the new ones on 6 meters! There is magic on that band!

You have to be there to work them! Rumble on Mumble or Plumble!

Here are the entities currently worked on 6 meters by SCDXC members this year.

DXLab Commander Sliders & Buttons

Bill Shell, N6WS

Are you tired of searching through your radio's menus to make an adjustment to the output power, noise limiter, dynamic noise filter, or selecting the correct antenna? Having to select a function in a menu to adjust, and then turning a 'Multi-Function' knob, just seems ridiculous. The cost of knobs must have gone through the roof, as evidenced by the Flex radios. To the 'average operators' that set their radios up for one mode, and then forgets there are adjustments for the various radio functions, the menus are probably just perfect. For the DXer that chases DX on more than one mode, I believe menus tend to be too cumbersome.

As more and more knobs disappear from our radios, those functions are moved to menus. One of the most disappointing things about my new FTDX101MP is not being able to adjust the monitor level while transmitting. If I double-click on a DX spot, and jump into a pileup, I don't really want to stop the chase, select the menu option to set MON LVL, turn the multi-function knob to lower the level, and then return to the pileup. I will have missed several attempts to call the DX station while playing with the menu to set the correct monitor level. From these complaints, you would think I miss having the convenience of all the knobs on my FTDX5000. Well, I did until I setup the sliders and buttons in DXLab Commander to allow me to have the separate controls without delving into the menu system of the FTDX101MP.

The first knob I missed was the power adjustment PWR LVL knob. I had a control in my DXLab Commander function button (f5) with the FTDX5000. I had made macro button for my FTDX5000 to rapidly switch between 200W (barefoot) to 35W (1.5kW through my amp). It just required some minor command changes to use it on my FTDX101MP. Instead of having to adjust the power control knob I wanted a few preset power levels for various operating conditions. So, I set the Commander function key (f5) button to toggle through 200W (Full Power), 100W (Normal Barefoot for me), 50W (Low Power FT8), 35W (1500W through my PA), and 23W (1000W through my PA). A copy of that command macro is in the files area of GUNsHub Space General Ham Information Files area.

The next thing I tackled was a feature the FTDX5000 had, that is now a menu item on the FTDX101MP. When chasing DX on CW or SSB, it was convenient to press and hold the split button and have the transceiver automatically change to split mode with the B-VFO offset by 1 or 5 kHz depending on the mode. Well, the FTDX101MP has a split button, but when it is depressed and held, a menu pops up on the screen. You then have to select the number 1 or 5 in the on-screen keypad and then kHz for the offset to take affect. I added buttons for CW+1 and SSB+5 on the Commander screen to take care of the mode and offset with a single function key. I was also able to add a few functions I typically use when chasing DX in split mode. I set A-Receiver to narrow CW ~300Hz to listen to the DX station, and the B-Receiver to ~3kHz to search the pileup for the responding station. The similar SSB button offsets the B-Receiver by 5kHz, sets A-Receiver bandwidth to 1.8kHz, and R-Receiver to 2.4kHz. These files are in the Files area labeled 00-CW+1.txt and 00-SSB+5.txt.

The files I described in the above paragraphs can be found at:

<https://gunshub.ddns.net/>

Under - General Ham Information/DXLab Files/Sliders & Buttons

There are detailed instructions on the DXLab Website for generating your own sliders and buttons. The Webpage is:

<https://www.dxlabsuite.com/commander/Help/CommandSequences.htm>

For those not wanting to write your own macros for buttons, or setting parameters for the sliders, there is an extensive library on the DXLab Groups.io Website for various models of Alinco, Elecraft, Flex, Icom, Kenwood, Tentec, Xiegu, and Yaesu radios. The libraries of slider and button files are located at:

<https://groups.io/g/DXLab/files/Command%20Sequences%20and%20Sliders>

If you don't find a function you want in the library and don't want to learn a new macro language, you can always ask for help on DXChat or GUNsHub.

TID BITS

For Sale (N6CA)

SteppIR DB18E

4 years old, initially painted with Rust-Oleum Winter gray paint.

Latest firmware update in SDA100 Controller, with serial interface and PTT Line Interrupt

This antenna has:

3 Elements on 30m thru 10m

2 elements on 40m

140 foot control cable

(3) element truss kits w/ new SS clamps

boom truss w/ new SS clamps

Instruction manual (also available on-line if needed)

New sweep tube gasket materials and tape, ready for assembly

The new cost today for this antenna is \$5,423, plus shipping.

Asking \$2,300

Antenna has been removed from the tower, refurbished and completely checked out even with full extension of elements and cleaned. Antenna is ready for assembly.

Sorry, no shipping. Pick up only in Lomita CA 90717

73 Chip N6CA (310) 989-7004

Novex Help Wanted (W6HB)

Help wanted: person mechanically capable with tools such as power band/ hack saws, drills, hand-operated punches, low-level machine and shop work using sanders, benders is helpful. Assembly including common hardware building equipment mounting racks such as portable radio Go Boxes, light metal-work; we will train. If you are able to read a ruler and/ or dial-calipers, change your own oil and know where the battery is in your car for jump-starting you are probably qualified. Ham radio skills a plus. Take a look at www.Novexcomm.com and look in the Gallery to see what we do. Shop is at 22826 Mariposa Ave. Torrance. Hours flexible in case you are in school or have another job; we are a 10-5 M-F operation; full or part time is an option. Call: Bob Burchett WB6SLC 310.686.9973

Latest Solar Cycle Guess From Old NOAA

SOLAR CYCLE UPDATE: You probably think Solar Cycle 25 is a dud. Think again. Despite long stretches of spotless quiet, the new solar cycle is actually running ahead of schedule. In this plot, the red curve shows NOAA's predicted sunspot counts for Solar Cycle 25; the orange curve shows the new best fit:

Above: Observed and predicted sunspot numbers: [more](#)

"The sun is performing as we expected--maybe even a little better," says Lisa Upton of Space Systems Research Corporation. She's a co-chair of the NOAA/NASA Solar Cycle 25 Prediction Panel. "In 2019, the panel predicted that Solar Cycle 25 would peak in July 2025 (± 8 months) with a maximum sunspot count of 115 ± 10 . The current behavior of the sun is consistent with an early onset near the beginning of our predicted range."

If current trends hold, Solar Cycle 25 could peak as early as 2024, similar in strength to the relatively weak cycle (SC24) that preceded it. Don't be fooled by the adjective, however. It's like hurricane season. Even a "weak" season produces hurricanes--and all it takes is one good storm to do a lot of damage.

Above: 10.7cm radio flux, another indicator of solar activity, is also exceeding predictions: [more](#).

"I'm not surprised that people are grumbling about SC25 being a dud," says Upton. "Weak cycles are typically preceded by long stretches of spotless days, and they are slow to ramp up. All of this is consistent with our prediction."

Now the waiting begins. As sunspot counts increase over the next year, forecasters will be able to tell if Solar Cycle 25 is *really* following the official prediction or doing something completely different. Predicting the solar cycle is still an infant science, and much uncertainty remains. Stay tuned.

Propagation

There were several disturbed days this month and zero sunspot days however the number of sunspots is increasing. Maybe there is a trend? You can see where the sunspot minima occurred!

US Authorized Distributor and Repair Facility for
RF-Kit Power Amplifier & BEKO Elektronik

**Model RF2K-S, Fully-built,
FCC-Certified Legal-Limit HF
Linear Amplifier**
160 through 6-meter bands • AM, SSB, CW,
Digital modes • Interfaces with ALL
transceivers • FREE on-line software
updates • Built-in tuner • Pin-diode T/R
switching • Fully remote capable •
TFT Touch Screen display

**High Power VHF/UHF Amplifiers &
Low Noise Preamplifiers**
Standard Models for 2-meter through 23-
centimeter bands • SSB, CW, FM, Digital
modes • EME • Meteor Scatter • Built-in
preamp sequencer

All above Bavaria, Germany products include:
Latest LDMOS Solid-State Technology • High Efficiency • Instant-
ON • Lightweight • Whisper quiet operation • Integrated power
supplies • Input spike, temperature and VSWR protection •
Free Shipping

**Electrical Distribution Systems
Design & Installation**
